

Measuring For Safety Aprons

Measurements are extremely important in getting a proper fit. Please follow the instructions below. Take all measurements over breeches. Thank you!

1) Measure the waist closely, over the breeches you plan to wear.

2) Measure the hips at the fullest part. _____

3) While in the saddle or sitting on a flat surface like a piano bench or counter top measure the distance from the waist (in the back) to the saddle surface (or counter top). _____

4) While still seated measure from the left side waist to the left ankle for hunt length, or to the bottom of the left foot for saddle seat length. _____

5). Measure the distance from the right front waist to the tip of the right knee. (While sitting up straight). _____

6) Measure distance from the top of the right knee to the bottom edge of the right foot. _____

7) Measure around the thigh just behind the knee joint. Do this with the knee bent. _____

Please be sure to fill in the measurements page along with the order form. Thank you!
